

## Data Protection Solutions for Small Businesses and Workgroups

As your reliance on IT increases it is vital to ensure that you protect your organisation's data from hardware failures and other errors by storing backup and archive copies of data on offline storage. In addition, Data Replication can be used to restore data across the network, without having to rely on remote office personnel to restore data from tape.

Targetfour's Data Protection Solutions for Small Businesses and Workgroups typically combine:

- ◆ Overland Powerloader Tape Library
- ◆ Veritas Backup Exec
- ◆ Maxell Tape Media
- ◆ NSI Double Take
- ◆ HP NAS 1000

N.B. We can mix and match components from other suppliers such as IBM if you have a preferred manufacturer.

### Investment Protection

Targetfour's solutions are typically designed to be both cost effective and scalable to support the future needs of your organisation.

## Targetfour Data Protection Solutions

Targetfour are a Data Storage Solutions Provider specialising in helping companies to understand their data storage problems in order to develop an ongoing data storage strategy. Key issues we aim to address are:

- ◆ **Cost** of disk, tape, staffing and growth
- ◆ **Availability** of data, minimising downtime & data loss, increasing performance
- ◆ **Management** of complex environments and change

The independent nature of Targetfour enables us to provide data storage solutions from any one of a number of leading vendors that best deals with a customer's specific requirements. Targetfour can provide turnkey solutions that include project definition, installation, training and ongoing support and maintenance.
